

WHAT IS CLAIMED IS:

1. A holder for assisting in holding a paint container, comprising:

5 a sleeve adapted to receive a thumb of a hand; and
a retainer connected to said sleeve adapted to retain a handle of a paint container and allow a weight of the paint container to be transferred to a remainder of the hand supporting at a bottom of the paint container.

10

2. A holder as set forth in claim 1 wherein said sleeve is generally cylindrical in shape.

3. A holder as set forth in claim 1 wherein said
15 sleeve is generally tubular in shape.

4. A holder as set forth in claim 1 wherein said sleeve extends longitudinally to form a hollow interior.

20 5. A holder as set forth in claim 4 wherein said sleeve has at least one open end adapted to allow the thumb of the hand to extend into said hollow interior.

6. A holder as set in claim 1 wherein said sleeve
25 is made from a rigid material.

09910114-072001

7. A holder as set forth in claim 1 wherein said sleeve is made of a flexible material.

8. A holder as set forth in claim 7 wherein said sleeve is made from a strip of material extending longitudinally.

9. A holder as set forth in claim 1 including a fastener for fastening longitudinal ends of said strip of material together to form said sleeve.

10. A holder as set forth in claim 1 wherein said retainer has a general "U" shape.

11. A holder as set forth in claim 1 wherein said retainer is made of a spring material.

12. A holder as set forth in claim 1 wherein said retainer has a first end and a second end to form a hollow interior.

13. A holder as set forth in claim 11 wherein said first end is connected to said sleeve and said second end is movable relative to said first end.

a sleeve extending longitudinally to form a hollow interior with at least one open end adapted to receive a thumb of a hand; and

10

20. A holder as set forth in claim 14 wherein said retainer is made of a spring material.

21. A holder as set forth in claim 14 wherein said
5 retainer has a first end and a second end to form a hollow interior.

22. A holder as set forth in claim 21 wherein said
first end is connected to said sleeve and said second end is
10 movable relative to said first end.

23. A holder comprising:

a sleeve made of a flexible material having a wall
extending longitudinally to form a hollow interior with at
15 least one open end adapted to receive a thumb of a hand; and

a retainer made of a spring material connected to
said wall of said sleeve and adapted to retain a handle of a
paint container and allow a weight of the paint container to
be transferred to a remainder of the hand supporting a bottom
20 of the paint container.
